DETAILED ACTION

Upon further review, the remain claims require restriction

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 24-34 & 39-43, drawn to a method of extracting plant tissue, classified in class 210, various subclasses.
- II. Claims 35-38, drawn to plant tissue culture, classified in class 435, subclass 410.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are distinct methods. Plant tissue culture involves the *in vitro* growth of plant cells and/or tissue while the extraction process is chemical means for isolating compounds or mixtures of compounds from plant tissue.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for one Group is not required for the other, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
